

ULTRACECO LP2

Low pressure gas compressors

Applications

- ◆ Process industry
- ◆ on-site gas production
- ◆ medical gas supply
- ◆ leakage gas recovery

ULTRACECO LP

The oil-less low pressure compressors ULTRACECO LP were developed by ULTRA CONTROLO to provide high pressure gases to all requirements where an increase of pressure in the system is required.

ULTRACECO LP compressors work completely gas-tight and without shaft-sealing which could wear off.

ULTRACECO LP range has a maximum suction pressure of 20 bar and is therefore very suitable for gas compression of oxygen, nitrogen and inert gases.

Features

- ◆ Low pressure Oxygen compression
- ◆ Totally air cooled
- ◆ Totally automatic
- ◆ Different ranges
- ◆ Low noise level

Technical Data

- ◆ Suction pressure max. 20 bar
- ◆ Discharge pressure max. 60 bar
- ◆ Flow rate 5-30 m³/h
- ◆ Motor power max. 1,5 kW
- ◆ Compressor revolution 1500rpm
- ◆ Piston speed 1,0 m/s
